

**INTERDISCIPLINARY ENVIRONMENTAL
TOXICOLOGY SEMINAR
FALL 2007
ROOM 2271 C VMBSB
2001 SOUTH LINCOLN, URBANA**

August 24, 2007	Jodi Flaws	Bettina Francis	U of IL	Introductions to the seminar theme: Reproductive Toxicology
August 31, 2007	Invited	Researcher	Abbott Laboratories	To Be Determined
September 7, 2007	Rex	Hess	U of IL	The future of interdisciplinary toxicology research: animals, chemicals and cells
September 14, 2007	Mary Faith	Marshall	University of MN	Ethical Issues Related to the Participation of Human Subjects in Clinical Research Trials
September 21, 2007	Benita	Katzenellenbogen	U of IL	To Be Determined
September 27, 2007	Thomas	Zoeller	University of Mass	TOXICOLOGY OPEN HOUSE
October 5, 2007	Kevin	Gaido	CIIT	To Be Determined
October 12, 2007	Melissa	Pepling	University of Syracuse	To Be Determined
October 19, 2007	Robert	Koos	University of Maryland	Hypoxia-Inducible Factor 1: A Newly Recognized Mediator of Estrogen Action in the Uterine Endometrium
October 26, 2007	Cheryl	Walker	MD Anderson	To Be Determined
November 2, 2007	Mehmet	Uzumcu	Rutgers University	Developmental exposure to environmental endocrine disruptor methoxychlor: Consequences on the ovary and female fertility
November 9, 2007	Patricia	Hoyer	University of Arizona	Mechanistic insight into 4-vinylcyclohexene diepoxide-induced ovarian follicle loss
November 16, 2007	Sandra	Peterson	University of Mass	Multi-Tasking Neurons that Regulate Ovulation: Targets of Endocrine Disruptors?
November 30, 2007	Patricia	Hunt	Washington State University	The egg and the environment: new concerns about human pregnancy failure
December 7, 2007	Duncan	Ferguson	U of IL	Thyroid Disruptors and Neurodevelopment: Reduced Compensatory Reserve and Increased Sensitivity of the Fetus and Neonate to Thyroid Hormone Insufficiency
