The **Secure Pork Supply (SPS)** plan is intended for swine producers to ensure business continuity in the event of a foreign animal disease outbreak as well as protect the farm operations from endemic diseases.

## What do you need to implement an SPS plan?

- Premise Identification Number (PIN)
- Site-specific enhanced biosecurity plan
- Farm records (including movement records, delivery, visitors, etc.)
- Biosecurity training for the farm personnel
- Education on foreign animal disease signs and symptoms to facilitate disease monitoring
- Facilities for sample collection (oral fluid, nasal swab, and blood) in the event of an outbreak

## How do you get an SPS plan?
