

For Animal Owners

When To Suspect A ? Foreign Animal Disease

- ▶ High morbidity and/or mortality
- ▶ High abortion rates of unknown etiology
- ▶ Severe respiratory conditions
- ▶ Vesicular condition of any type
- ▶ Poor to no response to conditions when response is anticipated
- ▶ Recent foreign travel, foreign visitors, or receipt of foreign parcels
- ▶ History of importation of animals, embryos, or semen
- ▶ Undiagnosed central nervous system conditions
- ▶ Presence of exotic flies, mites, ticks, larvae
- ▶ Unusual or unexplained signs of illness
- ▶ Atypical findings at necropsy

If an animal owner suspects a foreign animal disease or any unusual disease symptoms in their herd, they must contact their veterinarian immediately.
