

# Estimated Costs of Common Procedures (2014-2015)

Estimates are rough estimates only. They are not a guarantee of the actual cost of the procedure. The numbers reflect our best knowledge of the potential cost of the bill. All pet owners are required to leave a deposit of one half of the high end of estimate when they leave their pet for care. The remainder of the bill must be paid at the time of discharge. Price increases occur on or around July 1.

## Estimated Costs of Selected Routine Small Animal Procedures

|                    |                                                    |
|--------------------|----------------------------------------------------|
| Medical record fee | \$14 (one-time record fee for new patients to VTH) |
| Emergency exam fee | \$91                                               |
| Referral exam fee  | \$71 - \$128                                       |

**Dental Procedures:** We highly encourage referring veterinarians to run blood work (CBC, chemistry in animals over 5 years or animals with systemic conditions) prior to patient's visit.

|                              |               |
|------------------------------|---------------|
| Routine prophy canine/feline | \$365 - \$575 |
|------------------------------|---------------|

Note: The variance is due to the need for full mouth radiographs and blood work. We highly encourage referring vets to run blood work (CBC, chemistry in animals over 5 or animals with preexisting systemic conditions) within two weeks prior to patient's visit. Abnormalities with blood work will be rechecked if needed at visit.

|                                            |                   |
|--------------------------------------------|-------------------|
| Prophy w/ extractions canine/feline        | \$600 - \$1,500   |
| Full mouth extractions feline              | \$1,250 - \$1,550 |
| Conventional root canal therapy canine     | \$950 - \$1,350   |
| Carnassial conventional root canal therapy | \$1,150 - \$1,450 |
| Titanium crown                             | \$1,050 - \$1,250 |

## Dermatology Procedures:

|                                      |                                                  |
|--------------------------------------|--------------------------------------------------|
| IDT (intradermal test – new patient) | \$405 (exam/cytology/scraping/IDT/record set up) |
|--------------------------------------|--------------------------------------------------|

Note: This does not include any medications, sedations or immunotherapy. For medication withdrawal times requirements prior to IDT, please contact dermatology service: 217-244-8303 or [vthderm@vetmed.illinois.edu](mailto:vthderm@vetmed.illinois.edu).

## Internal Medicine Procedures:

|                        |                                                                             |
|------------------------|-----------------------------------------------------------------------------|
| Bronchoscopy           | \$1,500 - \$1,600 (includes anesthesia/procedure/2 cultures/fluid analysis) |
| CSF tap                | \$600 - \$800 (includes anesthesia/procedure/fluid analysis/2 cultures)     |
| Cystoscopy             | \$1,800 (includes anesthesia/procedure/histopath/2 cultures)                |
| Gastroscopy            | \$1,700 - \$1,800 (includes anesthesia/procedure/histopath/rapid urea)      |
| I131 TX without workup | \$1,200 (treatment & hospitalization)                                       |
| I131 TX with workup    | \$2,000 (blood work/ultrasound/rads/treatment/hospitalization)              |
| Joint tap              | \$300 - \$500 (procedure/fluid analysis/2 cultures)                         |
| Prostatic wash         | \$200 - \$300 (procedure/fluid analysis/culture)                            |
| Rhinocopy with CT      | \$1,500 – \$2,200 (anesthesia/procedure/histopath)                          |

## Oncology:

|                         |                                                  |
|-------------------------|--------------------------------------------------|
| Oncology initial exam   | \$128                                            |
| Oncology initial workup | \$400 - \$600 (exam/x-ray/ultrasound/blood work) |

## Ophthalmology:

|                              |       |
|------------------------------|-------|
| Ophthalmology emergency exam | \$300 |
|------------------------------|-------|

**Orthopedic/Rehab Procedures:** All orthopedic pricing includes workup

|                              |                   |
|------------------------------|-------------------|
| Arthroscopy of any one joint | \$2,000 - \$2,900 |
| Fracture repair              | \$2,000 & up      |
| Hemilaminectomy              | \$3,100 - \$4,000 |
| Lateral fabellar suture      | \$2,200 - \$2,800 |
| Luxating patella             | \$2,000 - \$2,400 |
| TPLO/TTA                     | \$3,200 - \$3,800 |
| Rehab (consult)              | \$40              |
| Rehab (one session)          | \$32              |

**Soft Tissue Surgery:**

|                   |       |
|-------------------|-------|
| Referral exam fee | \$128 |
|-------------------|-------|

**Estimated Costs of Selected Outpatient Imaging Procedures**

---

**Radiographs:**

|                                           |               |
|-------------------------------------------|---------------|
| Chest or thorax                           | \$138         |
| Abdomen                                   | \$125         |
| Extremity (one site, e.g. radius, stifle) | \$120 - \$150 |

**CT:** Add'l fee for sedation/anesthesia as required

|                                      |            |
|--------------------------------------|------------|
| 1 site without contrast              | \$400      |
| 1 site with contrast                 | \$450      |
| Add'l sites with or without contrast | \$100 each |

**MRI:** Prices do not include anesthesia

|                                      |            |
|--------------------------------------|------------|
| 1 site without contrast              | \$825      |
| 1 site with contrast                 | \$1,099    |
| Add'l sites with or without contrast | \$259 each |

**Ultrasound:**

|                    |                           |
|--------------------|---------------------------|
| Abdomen            | \$238                     |
| Aspirate           | \$25 for initial aspirate |
| Additional lab fee | \$35                      |

**Echocardiogram:**

|                |       |
|----------------|-------|
| Echocardiogram | \$230 |
|----------------|-------|

**After Hours Add'l Fees 5pm - 8am:**

|            |      |
|------------|------|
| Radiograph | \$41 |
| CT or MRI  | \$51 |
| Ultrasound | \$26 |
